To Whom It May Concern,

The polyethylene terephthalate (PET) and polystyrene (PS) products supplied to you by **MULTI-PLASTICS EXTRUSIONS** comply with the US Food and Drug Administration's regulations for food contact packaging. Specific **FDA** regulations applicable to these products are:

- 21 CFR 177.1630 – *Polyethylene Phthalate Polymers*
- 21 CFR 178.3297 – *Colorants for Polymers*
- 21 CFR 177.1640 – *Polystyrene and Rubber-Modified Polystyrene*
- 21 CFR 177.1810 – *Styrene Block Polymers*
- 21 CFR 177.1520 – *Olefin Polymers*

In addition, PET products which contain a post-consumer PET have been reviewed by FDA and have considered safe and appropriate for packaging food under certain limitations (packaging and storage at room temperature and below only).

All **MULTI-PLASTICS EXTRUSIONS'** products also comply with the model **CONEG** legislation concerning toxic heavy metals. Regarding the presence of **Phthalates** (DEHP, DINP, DOP, etc.), we do not add any of these materials in the production process. However, please note that we have not verified the presence/absence of phthalates with all of our suppliers.

Regarding **California Proposition 65**, **MULTI-PLASTICS EXTRUSIONS** does not intentionally add any listed chemicals during its manufacturing process. In addition, we query our raw material vendors regarding use of these chemicals. To the best of our knowledge, our products, as supplied, do not require warning under this legislation.

Please call me if you need additional information.

Sincerely,
MULTI-PLASTICS, INC.

Stanley Yachera
Product Engineer
