Restriction on Hazardous Substances (ROHS)

TO WHOM IT MAY CONCERN:

The purpose of this letter is to assure you that the OPS and PET product lines manufactured by **MULTI-PLASTICS EXTRUSIONS, INC.** do not contain heavy metals above the concentrations specified in the EU/EC ROHS regulation.

We determine this through supplier certifications under US CONEG and its European equivalent 94/62 EC, Article 11.

Regarding the other substances specified/limited in the ROHS regulation, we do not anticipate any of these materials being intentionally present, or present above the specified thresholds.

Please note, however, that we have not received verification of this from all of our raw materials suppliers regarding these substances; instead, we base this assumption on our experience that these substances are very unlikely to be used.

Please do not hesitate to contact me if you have any questions or require additional information.

Sincerely,
MULTI-PLASTICS EXTRUSIONS, INC.

Stanley Yachera
Product Engineer
