

CONEG MODEL LEGISLATION FOR HEAVY METAL CONTENT

This is to confirm that standard non-tinted T17 and T24 Clarifoil cellulose diacetate solvent cast film, manufactured by Clarifoil, conforms to the CONEG model legislation. The sum of concentration levels of lead, cadmium, arsenic, antimony, barium, chromium, mercury and selenium does not exceed 100 ppm in total and, in fact, lies well below this level. These results are also valid for Clarifoil 80µ 3-D colours.

Element		Measured in Clarifoil
Arsenic	(As)	<10
Antimony	(Sb)	<5
Barium	(Ba)	<5
Cadmium	(Cd)	<1
Chromium	(Cr)	<5
Lead	(Pb)	<10
Mercury	(Hg)	<10
Selenium	(Se)	<10
Total of above elements		<60
